

Announcement

Termination of service support of the KLY-3/4 Kappabridges and JR-5 Spinner Magnetometer

Dear users of AGICO instruments,

we would like to inform you about upcoming termination of the service support of the Kappabridges KLY-3, KLY-3S, KLY-4 and KLY-4S and Spinner Magnetometers JR-5 and JR-5A.

Production of the instruments mentioned above was ended more than ten years ago and service and repairs of these instruments is more and more complicated, especially due to the lack of the spare parts. For this reason **AGICO** will not be able to guarantee successful repairs of these instruments.

Instruments can be upgraded to the higher versions (KLY-3 to KLY-3S, KLY-4 or KLY-4S; KLY-4 to KLY-4S; JR-5 to JR-5A), but the service support of upgraded instruments will be limited to two years from the date of the upgrade.

Service support of the instruments will be ended on 30th June 2019, until that date the instruments can be sent for repairs and refurbishment.

Supply of the standard accessories (sample holders, spare screws, spare belts, temperature sensors and so on) for the instruments will continue without further limitation.
